

# **Ansible with YAML Scripting**

## **1. Introduction**

What is Ansible?

Why do we use Ansible?

Advantages of Ansible

Installation of Ansible

Ansible Terminologies

## **2. Ansible Inventory Introduction**

What is Ansible Inventory?

How to write Inventory files for hosts and groups

## **3. Ansible Ad hoc Commands**

What is Ansible Ad hoc command?

Basic Syntax for Ansible Ad hoc commands

What is module?

How to use Ansible Ad hoc commands with different modules?

How to use inventory file dynamically in Ad hoc commands?

## **4. Ansible Configuration File**

About Ansible Configuration Files

Priority of Ansible Configuration Files while working with

Ad hoc commands or playbooks

## **5. Ansible Playbooks**

What is Playbook?

What is Task?

What is modules and How to use it?

How to get help of modules?

How to use modules with Playbooks?

Variables

**Input and Outputs of Playbooks**

**Conditionals**

**Loops**

**How to write Playbooks with different modules?**

**What is Handler and Use of it?**

**How to use Handlers in Playbooks?**

**What is Tag?**

**How to create Tags?**

**How to create and execute Ansible Playbook with Tags?**

## **6. Highly available Infrastructure with Ansible Roles**

**What is Ansible role?**

**How do we create Ansible Roles?**

**What is Ansible galaxy?**

**How to create Ansible roles directory structure?**

## **7. Working with Ansible Vault**

**What is Ansible vault?**

**How to Encrypt and Decrypt Ansible Playbooks with Ansible Vault?**

**How to view and edit Ansible Encrypted Playbooks?**

**How to reset a new Ansible vault password?**

## **8. Provisioning Servers from AWS Cloud**

## **9. Creating Custom Modules with Python**
